Full Stack Developer with a passion for creating meaningful tools for better living. Experience in JavaScript, React, Ruby on Rails, Redux, and a background in e-commerce entrepreneurship, insurance and hospitality. Strong skills in project management, client relations, and team leadership. Sneaker design and sports analytics enthusiast. Student for life.

TECHNICAL PROJECTS

Kick Series - [GitHub Frontend](#), [GitHub Backend](#) | [Demo](#) | [Live](#)

A sneaker design project management app.

- Incorporated ActionCable (Websocket) to broadcast real time user designs to all project participants.
- Employed HTML5 canvas to allow artist and designer users to design sneakers with React-Sketch.
- Utilized React Router to redirect user to their unique project management tools based on user type.
- Implemented JSON Web Tokens and localStorage to store encrypted user information client-side.

RESTcipe - [GitHub Frontend](#), [GitHub Backend](#) | [Demo](#)

A personal cooking app for finding and creating your own recipes.

- Created frontend and backend with create, read and delete functionality for user interactions with recipes.
- Utilized Yummly API with AJAX Request to extract recipe data according to user search terms.
- Developed Rails API backend for storing user recipe input by associating recipe, recipe-users and user.
- Customized front-end user interface with grid CSS design pattern.

Note it - [GitHub Frontend](#), [GitHub Backend](#) | [Demo](#)

A voice-based note taking app.

- Parsed SpeechRecognition API to obtain user speech response and render information in the container.
- Built frontend with vanilla Javascript for proper handling of speech events to display and preserve data.
- Utilized Rails API backend to store transcribed user's speech for easy access.

TECHNICAL SKILLS

Javascript, Node.js, Express.js, React, Redux, Ruby on Rails, Postgres, MongoDB
